Profile Summary

FrontEnd Web Developer Proficient in HTML, CSS, JavaScript, React.js, Redux, Bootstrap, Tailwind CSS, MongoDB, with basic knowledge of Node.js and Express.js. Skilled in API integration and building responsive, user-friendly web applications. A collaborative team player committed to staying updated with industry trends and delivering effective solutions. Passionate about creating exceptional web experiences that exceed client expectations.

Experience

- Sourcenet IT Service Provider (P) LTD.** **October 2024-March 2025**
- Developed a comprehensive health platform for a hospital to enhance patient experience and streamline healthcare services. The website allows users to book appointments, receive prescriptions from doctors, and enroll in wellness courses such as yoga to maintain a healthy lifestyle.
 - Developed a web-based social media platform that allows users to purchase subscribers, views, and likes for their posts across platforms such as YouTube, TikTok, and Instagram. Users can track order history, manage their uploaded blogs, and monitor engagement metrics.

- Ecode Dash Private Limited** **May 2025 – Present**
- Developed a full-featured real estate platform with separate user and admin interfaces. The Admin Panel allows administrators to add, update, and manage property listings with detailed specifications and pricing. The User Interface enables users to browse properties and directly contact dealers via email or phone.
 - Developed an interactive juice ordering platform where users can browse all juice varieties and place orders via WhatsApp, email, or call. The Admin Panel allows administrators to add, update, edit, and delete products. Designed an animated, responsive user interface to enhance user engagement and experience.

Internships

- Octanet : Frontend developer Intern** **Jan 2024-March 2024**
- worked as a frontend web developer where I worked on React JS, JavaScript, HTML, CSS, Bootstrap technologies and built the awesome clone of News website.
- Sevensoft Technologies** **May 2024 – Aug 2024**
- Created a real state website enhance the functionality and make smooth use for user. Integrate the application with the API.
